36 lbs. (16.3 kg) net

Timer

1 – 60 min

Agitation Method

Vibratory

RUGGED. COMPACT. QUIET.

The Meinzer II™ is a portable vibrating sifter, which is virtually maintenance free and built to last. Whether in the field or in the lab, the Meinzer II™ has proven to provide precise, repeatable results time after time.

By utilizing an electromagnetic drive motor, a fixed amplitude and rubber spring mounts, this device produces the simultaneous vertical and horizontal movement needed for basic dry particle sizing analysis. Each unit is thoroughly tested, guaranteeing performance right out of the box.
